Mike,

Howdy. I know you're in the field and this isn't urgent. I was just reviewing Circular 12 and the draft rules and wanted to just send you a reminder. By August, we will have completed an independent technical review of all the proposed criteria (e.g., wadeable, Yellowstone) except for Flathead Lake. We will need documentation from MDEQ on the basis for the criteria and why the criteria are scientifically sound. I think much/some of this justification may be documented in the Flathead TMDL doc - just wanted to make sure you had this one on your "list of things to do" as you finalize all the rule docs.

Let me know if you have any questions.

Tina
